

## SAFETY DATA SHEET

### CQ- Ultra 19 & 20

#### 1. Identification

##### Product identifier

Product name CQ- Ultra 19 & 20

Internal identification Replaces F-3000-75

##### Recommended use of the chemical and restrictions on use

Application Vacuum pump lubricant

Uses advised against This product is designed for use by technically competent persons. Any use of this product, other than for its stated use, should not be attempted without expert review.

##### Details of the supplier of the safety data sheet

Supplier Conquest West Inc

Manufacturer Conquest West Inc  
1415 Industrial Way  
Unit K  
Gardnerville, NV 89410

##### Emergency telephone number

Emergency telephone (775) 783-4182

#### 2. Hazard(s) identification

##### Classification of the substance or mixture

Physical hazards Not Classified

Health hazards Acute Tox. 4 - H312

Environmental hazards Not Classified

##### Label elements

Pictogram

Signal word Warning

Hazard statements H312 Harmful in contact with skin.

Precautionary statements P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.  
P302+P352 If on skin: Wash with plenty of water.  
P312 Call a poison center/ doctor if you feel unwell.  
P321 Specific treatment (see medical advice on this label).  
P362+P364 Take off contaminated clothing and wash it before reuse.  
P501 Dispose of contents/ container in accordance with national regulations.

##### Other hazards

This product does not contain any substances classified as PBT or vPvB.

#### 3. Composition/information on ingredients

##### Mixtures

100.0%

Mixture of severely hydroprocessed petroleum basestock

CAS number: —

Classification  
Not Classified

The Full Text for all Hazard Statements are Displayed in Section 16.

#### 4. First-aid measures

##### Description of first aid measures

General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Loosen tight clothing such as collar, tie or belt. Get medical attention if symptoms are severe or persist.
Ingestion	Rinse mouth thoroughly with water. Get medical advice/attention if you feel unwell. Do not induce vomiting unless under the direction of medical personnel.
Skin Contact	Rinse with water.
Eye contact	Rinse with water. Get medical attention if any discomfort continues.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.

##### Most important symptoms and effects, both acute and delayed

General information	Inhalation of vapor or ingestion of liquid accompanied by vomiting may cause lung aspiration which could lead to pulmonary edema or chemical pneumonia. Exposed persons should seek medical advice and be kept under observation for at least 48 hours to monitor for delayed effects.
Inhalation	May be harmful if inhaled.
Ingestion	May cause discomfort.
Skin contact	General observations of persons occupationally exposed to lubricants or mineral oils or products based on these oils indicate that higher viscosity oils can block skin pores causing an acne-like disorder. In addition, the oils or certain additives or impurities in the oils, as well as mechanical irritation from contaminants in oil based products, may cause dry cracked irritated skin (dermatitis). The International Petroleum Industry Environmental Conservation Association (IPIECA) advises that there is sufficient read-across data to assess the skin irritancy hazard of most petroleum substances (hydrocarbons in general) and may cause defatting of the skin, leading to skin dryness and cracking. It is advised to include appropriate warnings on the SDS.
Eye contact	No specific symptoms known. May be slightly irritating to eyes.

##### Indication of immediate medical attention and special treatment needed

Notes for the doctor	Treat symptomatically. In the event of injection into underlying tissue, immediate treatment should include extensive incision, debridement and saline irrigation. Inadequate treatment can result in ischemia and gangrene. Early symptoms may be minimal.
----------------------	---

#### 5. Fire-fighting measures

##### Extinguishing media

Suitable extinguishing media	Use fire-extinguishing media suitable for the surrounding fire. Extinguish with foam, carbon dioxide, dry powder or water fog.
------------------------------	--

##### Special hazards arising from the substance or mixture

Flammability Class	3.2 Combustible Liquid IIIB
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up. Combustible liquid.

Hazardous combustion products Thermal decomposition or combustion products may include the following substances:  
Harmful gases or vapors.

Advice for firefighters

Protective actions during firefighting Avoid breathing fire gases or vapors. Evacuate area. Keep upwind to avoid inhalation of gases, vapors, fumes and smoke. Ventilate closed spaces before entering them. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

Special protective equipment for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves will provide a basic level of protection for chemical incidents.

**6. Accidental release measures**

Personal precautions, protective equipment and emergency procedures

Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk.

Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment.

Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.

Reference to other sections

For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

**7. Handling and storage**

Precautions for safe handling

Usage precautions Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.

Advice on general occupational hygiene Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse.

Conditions for safe storage, including any incompatibilities

Storage precautions Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage.

Storage class Chemical storage.

Specific end uses(s)

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

**8. Exposure Controls/personal protection**

Exposure controls

Protective equipment

Appropriate engineering controls

Provide adequate general and local exhaust ventilation. Ensure the ventilation system is regularly maintained and tested. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Observe any occupational exposure limits for the product or ingredients.

Eye/face protection

Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

Hand protection

Wear protective gloves. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected.

Frequent changes are recommended.

Other skin and body protection

Wear appropriate clothing to prevent any possibility of skin contact.

Hygiene measures

Wash hands thoroughly after handling. Wash at the end of each work shift and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product.

Respiratory protection

Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. If ventilation is inadequate, suitable respiratory protection must be worn. No specific requirements are anticipated under normal conditions of use.

Environmental exposure controls

Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and Chemical Properties

Information on basic physical and chemical properties

Appearance	Colorless to pale yellow liquid.
Color	Colorless to pale yellow.
Odor	Petroleum.
Odor threshold	Not available.
pH	Not applicable.
Melting point	Not applicable.
Initial boiling point and range	Not available.
Flash point	≥ 225°C COC (Cleveland open cup).
Evaporation rate	Not applicable.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or explosive limits	Not available.

Vapor pressure	1 Pa @ 20°C
Vapor density	> 1
Relative density	~ 0.88 @ 25°C
Bulk density	Not available.
Solubility(ies)	Slightly soluble in water.
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Decomposition Temperature	Not available.
Viscosity	38.1-70 cSt @ 40°C
Molecular weight	Not available.

#### 10. Stability and reactivity

Reactivity	The reactivity data for this product will be typical of those for the following class of materials: Hydrocarbons.
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.

Materials to avoid                      Avoid contact with the following materials: Acids. Alkalis. Oxidizing agents. Reducing agents.

Hazardous decomposition products      Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. Carbon monoxide (CO).

#### 11. Toxicological information

##### Information on toxicological effects Acute toxicity - oral

Notes (oral LD<sub>50</sub>)                      Based on available data the classification criteria are not met.

##### Acute toxicity - dermal

Notes (dermal LD<sub>50</sub>)                      Based on available data the classification criteria are not met.

ATE dermal (mg/kg)                      1,100.0

##### Acute toxicity - inhalation

Notes (inhalation LC<sub>50</sub>)                      Based on available data the classification criteria are not met.

##### Skin corrosion/irritation

Animal data                                  Based on available data the classification criteria are not met.

##### Serious eye damage/irritation

Serious eye damage/irritation      Based on available data the classification criteria are not met.

##### Respiratory sensitization

Respiratory sensitization                      Based on available data the classification criteria are not met.

##### Skin sensitization

Skin sensitization                              Based on available data the classification criteria are not met.

##### Germ cell mutagenicity

Genotoxicity - in vitro                      Based on available data the classification criteria are not met.

##### Carcinogenicity

IARC carcinogenicity No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

Reproductive toxicity

Reproductive toxicity - fertility Based on available data the classification criteria are not met.

Reproductive toxicity development Based on available data the classification criteria are not met.

Specific target organ toxicity - single exposure

STOT - single exposure Not classified as a specific target organ toxicant after a single exposure.

Specific target organ toxicity - repeated exposure

STOT - repeated exposure Not classified as a specific target organ toxicant after repeated exposure.

Aspiration hazard

Aspiration hazard Based on available data the classification criteria are not met.

General information The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation No specific symptoms known.

Ingestion No specific symptoms known.

Skin Contact No specific symptoms known.

Eye contact No specific symptoms known.

Route of entry Ingestion Inhalation Skin and/or eye contact

12. Ecological Information

Ecotoxicity Dangerous for the environment if discharged into watercourses.

Persistence and degradability

Persistence and degradability The degradability of the product is not known.

Bioaccumulative potential

Bio-Accumulative Potential No data available on bioaccumulation.

Partition coefficient Not available.

Mobility in soil

Mobility No data available.

Other adverse effects

Other adverse effects None known.

13. Disposal considerations

Waste treatment methods

General information

The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

Disposal methods                      Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents.  
Incineration or landfill should only be considered when recycling is not feasible.

14. Transport information

General                                      The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DoT).

UN Number

Not applicable.

UN proper shipping name

Not applicable.

Transport hazard class(es)

No transport warning sign required.

Packing group

Not applicable.

Environmental hazards

Environmentally Hazardous Substance  
No.

Special precautions for user

Not applicable.

Transport in bulk according to              Not applicable. Annex II of MARPOL 73/78 and the IBC Code

15. Regulatory information

US Federal Regulations

SARA Section 302 Extremely Hazardous Substances Tier II Threshold Planning Quantities  
None of the ingredients are listed or exempt.

CERCLA/Superfund, Hazardous Substances/Reportable Quantities (EPA)  
None of the ingredients are listed or exempt.

SARA Extremely Hazardous Substances EPCRA Reportable Quantities  
None of the ingredients are listed or exempt.

SARA 313 Emission Reporting  
None of the ingredients are listed or exempt.

CAA Accidental Release Prevention  
None of the ingredients are listed or exempt.

FDA - Essential Chemical  
None of the ingredients are listed or exempt.

FDA - Precursor Chemical  
None of the ingredients are listed or exempt.

SARA (311/312) Hazard Categories  
None of the ingredients are listed or exempt.

OSHA Highly Hazardous Chemicals  
None of the ingredients are listed or exempt.

US State Regulations

California Proposition 65 Carcinogens and Reproductive Toxins  
None of the ingredients are listed or exempt.

California Air Toxics "Hot Spots" (A-I) None  
of the ingredients are listed or exempt.

California Air Toxics "Hot Spots" (A-II) None  
of the ingredients are listed or exempt.

California Directors List of Hazardous Substances  
None of the ingredients are listed or exempt.

Massachusetts "Right To Know" List  
None of the ingredients are listed or exempt.

Rhode Island "Right To Know" List  
None of the ingredients are listed or exempt.

Minnesota "Right To Know" List  
None of the ingredients are listed or exempt.

New Jersey "Right To Know" List  
None of the ingredients are listed or exempt.

Pennsylvania "Right To Know" List  
None of the ingredients are listed or exempt.

Inventories

EU - EINECS/ELINCS  
All the ingredients are listed or exempt.

Canada - DSL/NDSL  
All the ingredients are listed or exempt.

US - TSCA  
All the ingredients are listed or exempt.

US - TSCA 12(b) Export Notification  
None of the ingredients are listed or exempt.

Philippines - PICCS  
All the ingredients are listed or exempt.

New Zealand - NZIOC  
All the ingredients are listed or exempt.

**16. Other information**

Revision comments	NOTE: Lines within the margin indicate significant changes from the previous revision.
Issued by	HS&E Manager.
Revision date	6/1/19
SDS No.	4656
SDS status	Approved.
Hazard statements in full	H312 Harmful in contact with skin.

End of SDS
